

PROFILE SUMMARY

Experienced VoIP Network Engineer with 1.8+ years in network engineering, seeking to leverage my knowledge of VoIP technologies and networking to contribute to the success of a forward-thinking organization. I aim to secure a challenging role in a dynamic company where I can apply my technical expertise to enhance network efficiency and support organizational growth.

PROFESSIONAL EXPERIENCE

Organization : _____ **Duration :** February 2023 - Present
Designation : VoIP Network Engineer

- Providing support for Cisco IP telephony of various clients for 24/7.
- First level troubleshooting and monitoring of IPT related issues.
- Attending daily status report and incident management calls.
- Attending day to day MACD issues of the IP phones and handling of end users.
- Using BAT for various administration and managing purpose.
- Monitoring and analyzing existing VoIP networks and computer systems (CUCM).
- Collecting logs and traces from RTMT.
- Configurations of phone button template and soft key template.
- Configurations of user features such as speed dial, call parking, transfer, call forwarding, call pickup, conference.
- Analyzing the call through Dialed Number Analyzer(DNA) and Call Detail Record(CDR) to troubleshoot call routing issues.
- Monitoring and troubleshooting of voice gateways like SIP,H323, MGCP.
- Maintaining call routing and call privileges through CSS and Partition as per client requirements.
- Configuration and troubleshooting of voice interfaces FXS, FXO and ISDN E1 T1.
- providing path for calls through Route list, Route group, Standard local route group(SLRG).
- Maintaining call coverage through Hunt list, Hunt group.
- Maintaining bandwidth of calls through Call Administration Control(CAC) and Automated Alternated Routing(AAR).
- Providing support for redundancy mechanism like SRST, MGCP Fallback.
- Configuration of media recourses Conference, MOH, Transcoder, MTP.
- Management of voice mail users.
- Work together with our team to troubleshoot various complex issues.
- Updating client with regular activates reports.

Organization : Spectra Telecom **Duration :** January 2022 - January 2023
Designation : RF Support Engineer

- To perform Drive Test for 2G/3G/LTE Services by using the TEMS tool.
- Analyze drive test data on TEMS investigation for network analysis, site verification, problem identification and solutions.
- Handling all RF related customer complaints by checking serving sites, analyzed interference, call drops, handover failures, Rsrp, Rx Quality, Rx level etc.
- Sites audit and optimization.

Organization : EXA Telecom **Duration :** April 2020 - January 2022
Designation : Site Engineer

- Site Engineer in charge of 2G,3G&4G installations.
- BTS(FSMF), RRU (AZNA FRGT, AHGA, FZNI, AZHA etc.) and GSM (Low/hi Gain, twin beam)antenna installation.
- Bharti Airtel TDD full site, TDD twin beam installation.
- Vodafone-idea full site installation and integration.
- SCFT Drive Test using AZENQOS software.
- Guiding the team and sharing ideas, methods and information

Organization : SKY Telecom Solutions **Duration :** March 2019 - March 2020
Designation : Site Engineer

- Site Engineer in charge of 2G (900),3G (2100),4G (1800,2300,2500) installations
- BTS(BBU)and AZNA RRU 5 series,3series, GSM (Low Gain) antenna installation.
- Vodafone-idea TDD full site integration.
- Vodafone-idea limited GUL, TDD installation and configuration, handling 10port,6port,4port antenna
- Advance knowledge in Huawei modules.

TECHNICAL SKILLS

- Configuration of various features in Cisco Unified Communication Manager(CUCM).
- Configuring call manager user features and services familiar with various Cisco IPT Devices.
- Configuration of Cisco IP phones and third party Sip phones.
- Using Bulk administration tool for various administration and managing purpose.
- Understanding of various call control protocols like SIP, MGCP, H323, SCCP.
- Configuration and troubleshooting of ISDN PRI(E1, T1) and FX trunks(FXS, FXO).
- Configurations of phone button template and soft key template.
- Configuration of Device pool, Location Region.
- Configuration of VoIP and POTS dial peers, route pattern, route list, Hunt list, route group.
- Configuring End users and Application users.
- Knowledge in CUCM cluster and Cisco voice network deployment models.
- Knowledge of Database replication.
- Knowledge in show commands and Various debug comments.
- Class of service control and restrictions using Partition and CSS.
- Configuration and troubleshooting of Extension mobility.
- Usage of monitoring tools like Real Time Monitoring(RTMT)tool.
- Dialed number analyzer(DNA).
- Call details record(CDR).
- Knowledge in CAC and AAR.
- Configuration of media resources like Conference, MOH, Transcoder, MTP.
- Knowledge in CUBE configuration.
- knowledge in SNR.
- Managing dial plan using Translation pattern, Route pattern, Calling and Hold transformation mask, FAC, CMC, Route list, Route group and Local route group.
- Good knowledge in redundancy mechanism like SRST, MGCP Fallback.
- Knowledge in basic Codec's in Region.
- Configuration and management of Cisco Unity Connection(CUC).
- Configuration of PLAR.
- Integration of CUC with CUCM using SCCP and SIP protocol.
- Good understanding of OSI model & TCP/IP protocol suite.
- Knowledge on IP addressing and Subnetting (FLSM, VLSM).
- Configuration and Troubleshooting of Routers and Switches.
- Routing all types Static Routing, Dynamic Routing and Default Routing.
- Configuration and Troubleshooting of Routing Protocols like RIP V2, EIGRP, OSPF
- Configuring and Implementing DHCP (DORA Process).
- Configuring Redistribution between various Protocols.
- Knowledge on ACL-Standard, Extended, Time-Based, Numbered ACL, Named ACL.
- Configuration and Troubleshooting of LAN technologies like VLAN, Inter VLAN.
- Accessing and Configuring Remotely to the Cisco Switches by using Telnet and SSH.
- Knowledge in configuring VLAN Trunking (IEEE 802.1Q and ISL).
- Knowledge in Spanning Tree Protocol.
- NAT: Static NAT, Dynamic NAT, PAT.
- VTP-Implementing and managing Server, client and transparent mode.
- Skilled in performing drive tests and analyzing data for 2G, 3G, and LTE networks using TEMS Investigation for network performance evaluation.
- Expertise in identifying and resolving RF issues such as call drops, interference, handover failures, and optimizing network performance.
- Ability to analyze KPIs like Rsrp, Rx Quality, and Rx Level to assess network health and implement optimization strategies.

UC SKILLS

- CUCM, CME
- IM & PRESENCE
- JABBER
- CISCO UNITY
- CONNECTION (CUC)
- SRST, SLRG
- REAL TIME MONITORING
- PROTOCOL (RTMP)
- CALL DETAIL RECORD(CDR)
- DIALED NUMBER ANALYZER (DNA)
- H.323 PROTOCOL
- MGCP, SIP, SCCP
- RTP, RTCP
- ISDN
- DNS

DECLARATION

Bangalore

Vishnu C

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief.

Bangalore

COURSE COMPLETED

- Cisco Certified Network Professional (CCNP-Collaboration)
 - Cisco Certified Network Associate (CCNA-Collaboration)
 - Cisco Certified Network Associate (CCNA- Routing and Switching)
 - MS Teams
-

EDUCATION

Diploma

Electronics Engineering
Govt Polytechnic college palakkad
Year: 2015-2018

HSE

Biology Science
Kerala State Education
Year: 2013-2015

PERSONAL DETAILS

Date of Birth : 18-07-1998

Nationality : Indian

Gender : Male

Languages : English, Malayalam, Tamil

Address : Bangalore, Karnataka
