13th Cross, Venkateshwara Layout,

BTM Second Stage 560068

Summary

Dynamic and detail-oriented VoIP Network Engineer with 1.8 years of experience in designing, implementing, and managing VoIP solutions. Seeking an opportunity to leverage my technical expertise and problem-solving skills in a challenging role that fosters innovation and enhances network performance. Committed to delivering high-quality support and improving customer satisfaction through effective communication and collaboration.

Experience

XYZ Inc February 2023 - Present
VoIP Network Engineer Bangalore

Job Responsibilities

- Responsible for the handling and configuration of Cisco IP Phones, ensuring seamless communication for users.
- Attended daily status reports and incident management calls to address and resolve issues promptly.
- Troubleshoot Voice Gateways (H323, SIP) and SRST, ensuring optimal performance and reliability of voice services.
- Implemented Class of Service using Partition and Calling Search Space (CSS) to manage call routing effectively.
- Configured various user features, including Call Park and Call Pickup, enhancing user experience and productivity.
- Collaborated with multiple vendors to provide immediate support for installations, troubleshooting, and repair issues.
- Utilized monitoring tools such as RTMT, CDR, and DNA for real-time performance analysis and issue resolution.
- Integrated Voicemail systems with Cisco Unity, enhancing communication capabilities for users.
- Managed VoIP and POTS dial peers, route lists, and hunt lists, ensuring efficient call handling.
- Maintained hunt groups and lists, optimizing resource allocation and availability.
- Handled service calls and provided technical assistance to clients, ensuring high levels of customer satisfaction.
- Monitored Voice Interfaces, including ISDN E1/T1, for performance and quality assurance.
- Possessed basic knowledge of Cisco Jabber & IM & Presence for enhanced user collaboration.
- Conducted Bulk Administration Tool (BAT) operations for IP Phones, Users, and IP Communicator.
- Collaborated with team members to solve critical issues effectively, fostering a team-oriented environment.
- Managed simple and complex Moves, Adds, Changes, and Deletes (MACD) requests for customers.
- Configured voice interfaces such as FXS and ISDN T1/E1, ensuring compatibility and functionality.
- Troubleshoot phone unregistration issues, minimizing downtime for users.
- Configured Softkey and Phone Button Templates for consistent user interface across devices.
- Established Device Pools, Regions, and Locations for optimized call management.
- Demonstrated knowledge of Cisco voice network deployment models and functioning of voice network devices.
- Served as an onsite technical assistant for remote troubleshooting, facilitating effective issue resolution.
- Proficient in using show commands and various debug commands for network diagnostics.

Technical Skills

- Programmed CUCM route patterns and dial peers to support H.323, MGCP, and SIP gateways, ensuring effective call routing.
- Utilized show commands and various debug commands for troubleshooting and diagnostics within the VoIP environment.
- Configured and troubleshoot Extension Mobility, enabling users to access their profiles on different devices.
- Implemented Class of Service controls and restrictions using Partitions and Calling Search Spaces (CSS) to manage user access.
- Configured media resources such as Music on Hold (MOH), Media Termination Points (MTP), and transcoder resources for optimal call handling.
- Configured and troubleshoot Cisco Jabber and IM & Presence services, enhancing communication and collaboration capabilities for users.
- Managed Bulk Administration Tool (BAT) operations for IP Phones, Users, and IP Communicator, streamlining device management.
- Configured routers, switches, and other networking equipment for testing activities, ensuring compatibility and performance.
- Utilized monitoring tools like Real-Time Monitoring Tool (RTMT), Dialed Number Analyzer (DNA), and Call Detail Records (CDR) for performance analysis and troubleshooting.
- Integrated Cisco Unity Connection (CUC) with Cisco Unified Communications Manager (CUCM) using SCCP and SIP protocols for enhanced voicemail services.
- Configured Call Manager Express (CME) on Cisco routers to facilitate voice services for small to medium-sized businesses.
- Troubleshoot SCCP IP phones and analog MGCP endpoints, ensuring reliable communication services for users.
- Configured and managed Cisco IP Phones and third-party SIP phones, providing support for diverse user environments.
- Implemented Call Admission Control (CAC) and Automated Alternate Routing (AAR) for effective bandwidth management.
- Managed Client Matter Code (CMC) and Force Authentication Code (FAC) features to enhance call tracking and security.
- Configured SRST and Standard Local Route Groups (SLRG) to ensure continuous call service during outages.
- Implemented Single Number Reach (SNR) and Mobile Voice Access (MVA) to provide seamless connectivity for mobile users.
- Demonstrated knowledge of database replication processes, ensuring data integrity and availability across systems.
